

JOB POSTING: JUNIOR DESIGN TECHNICIAN – MECHANICAL DESIGN

DER Solutions is a distributor of building and energy products to the commercial markets including multi-unit residential buildings, large track builds, office, retail, manufacturing and institutional. We are the Ontario distributor for commercial HVAC products for the Panasonic lineup of air source heat pumps and ventilation.

We are looking for a junior design technician to support our team in a technical capacity and support our inside sales. The successful candidate will be responsible for:

- Assisting with the development, coordination and preparation of HVAC designs.
- Performing quantity takeoffs from mechanical construction drawings
- Assisting with preparation of bill of materials
- Assisting with preparation of detailed construction & design estimates

The position will also include communicating with engineers and mechanical contractors to answer technical queries and provide inside sale support with quotation development and submittal applications. The position will require some administration and research of supporting products.

Qualified candidates will possess the following skills:

- Capable of reading and understanding construction drawings
- Skilled in MS excel, MS word
- Friendly and reliable disposition
- Good customer service
- “Dig-in” attitude

This position will allow the successful candidate to grow their skill set with exposure to product manufacturers, engineers, developers and mechanical trades while being supported by industry experts.
